Tolerance on Length			Up to 3/4 in., Incl.: -.03				Over 3/4 to 1-1/2 in., Incl.: -.05				Over 1-1/2 in.: -.06			

Description	A thread cutting screw with machine screw thread pitch, a blunt point, tapered entering threads, a single wide cutting edge, and a chip cavity.
Applications/Advantages	Steel type-23's are well-suited for cast iron and zinc, aluminum die castings, and plastics. The type-23 design provides excellent chip clearing with minimum tightening torques. 18-8 stainless screws offer additional resistance to corrosion. When using any thread-cutting screw, the material in which the threads are cut should have a lower hardness by at least 10 to 20 Rockwell hardness points.
Material	Steel: AISI 1016 - 1024 or equivalent steel; Stainless: 18-8 stainless steel.
Heat Treatment	Steel: Screws shall be quenched in liquid and then tempered by reheating to 650°F minimum.
Surface Hardness	Steel: Rockwell C45° minimum
Case Depth (steel)	No. 2 thru 6 diameter: .002 - .007 No. 8 thru 12 diameter: .004 - .009 1/4" diameter and larger: .005 - .011
Core Hardness	Steel (after tempering): Rockwell C28 - 38 Stainless: Rockwell B90 - C20
Plating	See Appendix-A for plating of steel thread-cutting screws.
